1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1-3, 5, 15, 16, and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shin in view of either Miller et al, newly cited, or Soltis, newly cited. Shin discloses the claimed invention except for the trapping device comprising a bulk filter material and a metallic element disposed on a surface or within the material. Miller et al teaches a trapping device or filter comprising a bulk filter material 41, 42, or 43, and a metallic element 40 disposed within the material. Soltis teaches a trapping device or filter comprising a bulk filter material 20, 22, 24, and a metallic element 34 or 36 disposed on a surface of the material. It would be obvious to substitute, for the trapping device 134 of Shin, a trapping device of the type taught in either Miller et al or Soltis, for the purpose of removing the water from the airflow more completely.
3. Claims 6-9, 11-14, and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.
